PROJECTS

AI-Powered Heart Disease Risk Detection May - 2026
Tools: RapidMiner Studio · Excel · CDC BRFSS Dataset (Kaggle) — Domain: Healthcare / Predictive Analytics

- **Built a 3-model ML pipeline** (Logistic Regression, Decision Tree, Random Forest) on 50,000 CDC BRFSS records with 19 features, achieving **90.98% accuracy and AUC of 0.824**.
- **Improved model accuracy** by engineering 2 custom features – Lifestyle Score and Health Burden Index – validated with 10-fold cross-validation across all models, using AI-assisted debugging to accelerate RapidMiner pipeline iteration.
- **Produced a risk-tiered CSV output** categorizing all records into Low / Moderate / High / Critical tiers with tailored recommendations per individual record. **Project Files** – [Link](#)

District Priority Index – UIDAI Data Hackathon 2026 Jan - 2026
Tools: Microsoft Excel — Domain: Government Data / Market & Enrollment Analytics

- **Engineered a weighted District Priority Index** by collecting, cleaning, and aggregating 500,000+ Aadhaar enrollment and biometric records across district-level data sources.
- **Identified actionable enrollment and update rate patterns** through comparative analysis of raw records, surfacing data-driven prioritization insights for a national-level submission.
- **Delivered a structured analytical report** with visual summaries and district-level findings, equivalent in depth and format to a formal appraisal-style output. **Project Report** – [Link](#)
